

CB Double Acting Piston Cups

This double acting piston cup is a single piece unit designed to be fastened directly to the rod. The existing center hole may be enlarged to fit larger diameters.

The cup is made of 90 durometer nitrile vulcanized to the coated steel plate. It is suitable for use in pneumatic and low pressure, light duty hydraulic cylinders.

Temperature: -40 to 200F
 Pressure: 0 to 250 PSI

Part Number	Bore Dia. A	Center Hole B	Base Height C	Total Height D	Price
