

AS800 Polyurethane Piston Seals

AS800P square piston seal assemblies are made from polyurethane and include an o-ring energizer. They install easier than teflon, because they snap back into the groove - no re-sizing. The wear properties are good due to the high durometer of urethane used.

Temperature: -65 to 220F

Pressure: 0 to 5,000 PSI

AS800 Poly Piston Seals

Part Number	Bore Dia. C ±.001	Piston Dia. B ±.001	Groove Dia. A ±.002	Groove Width D ±.002	Wall & Width D ₁	Price
