

# Urethane Piston U-Cups

UNP series urethane u-cups are non-symmetrical in design and are meant only to be used for reciprocating hydraulic piston applications. They are manufactured slightly smaller in diameter than nominal dimensions. This ensures a tight fit when installed in the groove. Good stability and decreased heel drag, resulting in lower friction, are the prime features of this seal.

Temperature: -65F to 200F

Pressure: 0 to 5000 psi
