

# KZT WASTE DISCHARGE RING

The KZT Waste Discharge Ring is comprised of bronze filled TFE. When used in conjunction with a piston seal or guide ring, these medium duty wearbands ingest metal particles before they contaminate the seal. A unique groove and channel facilitates a smoother flow of oil.

**Applications:** excavators, forklift trucks, bulldozers, road graders & loaders.

**40 sizes** in stock & ready to ship!

Temperature Range: -100 °F to +500 °F  
Pressure Range: 2,200 psi

**Allegheny York LLC**

3320 Connelly Rd. Emigsville, PA 17318-183
